RESIDENTIAL AI TRAINING

AI training that pays for itself.

Take your team to DreamLab's lab in the Lake District for one to three days. Arrive with a business problem; leave with a working AI prototype, a costed plan and the people who can keep it going. Click Through scopes it with you and carries it on afterwards.

- 1–3 days, full-board
- Teams of up to 8
- 40+ specialists on call

A prototype that works.

Not slides. Your team builds a real AI workflow on your real data, with specialists beside them.

A plan you can cost.

What to automate first, what to leave alone, what it will take. Written down before you leave.

People who can carry it.

Your staff come home able to run and extend what they built. Click Through stays on hand after.

THE LAB

A working studio, not a hotel conference room

A production studio, a robotics and XR floor, GPU compute and three bedrooms in a Lake District village, so the team eats, sleeps and builds in one place. Phones go quiet, the work gets done.

Format	Group	Board
1–3 days	Up to 8 people	Full-board

How it works.

01 — CLICK THROUGH
Scope the problem.
A free 45-minute call

02 — DREAMLAB
Design the residential.
Specialists, modules, length

03 — TOGETHER
Build it, keep it going.
Built at the lab, carried on

DISCOVERY CALL	RESIDENTIAL	BUILD SPRINT
