DREAMLAB AI
APPLIED INNOVATION LAB · LAKE DISTRICT

IN PARTNERSHIP WITH **ClickThrough.**

RESIDENTIAL AI TRAINING

Three days. One lab. A prototype that actually ships.

Bring up to eight people to a working studio in a Lake District village. Build on your own data with resident specialists, eat and sleep on site, and go home with something running. Click Through scopes it and keeps it alive after.

HOW IT WORKS

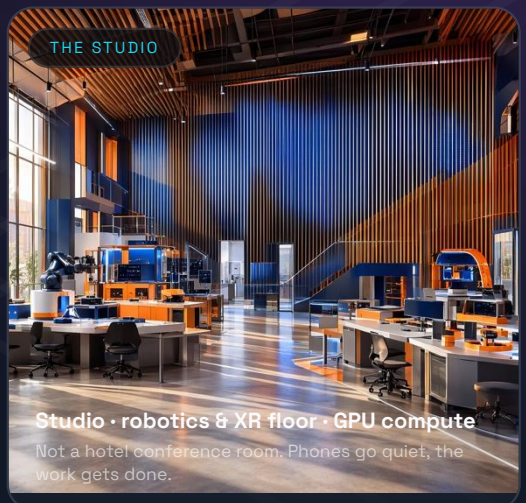

Scope → build → keep it running

1 — CLICK THROUGH — Scope
A free 45-minute call finds the one process worth automating first.

2 — DREAMLAB — Build
Specialists, modules and length matched to your team and your data.

3 — TOGETHER — Run
Your people take it home. Click Through carries it into your operations.

- **Day 1** Arrive, eat, map the problem, pick the stack, first pipeline running by dinner.
- **Day 2** Studio day: data in, model out, robot arm or camera rig if the brief wants it.
- **Day 3** Harden, document, demo, plan the next 90 days. Walk the fells if there's time.

WHAT YOU LEAVE WITH

- **A working prototype** on your data, in your repo
- **Costed 90-day plan** what to automate, what to leave
- **People who run it** your staff, not a vendor
- **Ongoing support** Click Through on hand

Click Through's clean sales funnel meets DreamLab's network of specialists.

PRICING

Free	Discovery call, 45 min
From £995	Residential, per person per day, full-board
From £2,500	One-day build sprint, per team

Every engagement is scoped and priced for your team; figures are a guide.
